43RD ANNUAL MEETING OF THE SOUTHEAST PEDIATRIC CARDIOLOGY SOCIETY

September 23 – 25, 2010 | Charlotte Marriott City Center | Charlotte NC

FEATURED SPEAKERS
Stephen Archer, MD
D. Dunbar Ivy, MD

Jointly Sponsored by
Southeast Pediatric Cardiology Society and Charlotte AHEC
The primary focus of the 43rd Annual Meeting of the Southeast Pediatric Cardiology Society centers in the causes and treatment of Pulmonary Artery Hypertension. In 2007 the American College of Chest Physicians updated their evidence-based guidelines for PAH treatment and more recently, several important clinical trials have been published and new treatments have received regulatory approval.

The topics have been selected to improve the diagnosis, treatment and ultimately patient outcomes of this rare, but debilitating disease. The content of the meeting will cover modern therapeutics, a debate about whether cardiac catheterization is required to assess patients with pulmonary hypertension, and PAH follow-up in the outpatient setting.

Other topics include imaging, anesthesia and interventional / surgical procedures.

The invited speakers constitute national experts in these disciplines, such as D. Dunbar Ivy, MD from the University of Colorado in Denver and Stephen Archer, MD from the University of Chicago, both internationally known in their fields.

OBJECTIVES

• Identify and manage children with pulmonary hypertension
• Review the causes concerning pulmonary hypertension and recent advances regarding its treatment
• Analyze the particulars of running a pulmonary hypertension clinic
• Attend abstract sessions of pediatric cardiology fellows and faculty practicing in the region
• Review cardiac catheterization of the adult with congenital heart disease (ACHD)
