Goal
This conference will provide participants with information on various aspects of current diabetes management, including new trends in diabetes care and treatment.

Objectives
At the completion of this knowledge based activity, the participant should be able to:
1. Compare and contrast the egregious eleven with the ominous octet.
2. Describe the most recent evidence-based nutrition practice guidelines (NPGs) for T1 and T2 diabetes and methods for application to improve patients’ knowledge and skill outcomes.
3. Summarize the key components of diabetes management in the pediatric population
4. Identify the role of motivational interviewing communication styles to help increase adherence to diabetes management
5. Discuss the implications of gaming approaches for self-management and adherence in diabetes.
6. Outline key components to consider when working with insulin pumps
7. Describe the best practices in the management of gestational diabetes and T2DM in pregnancy
8. Discuss new research, products, and trends in the advancement of technology used to manage diabetes.
