Mary Decker, MD, Panelist

2:45 - 3:00 Closing Remarks: Richard L. White, MD, FACS

COURSE OBJECTIVES:
Upon completion of this educational activity, participants should be able to:
• Incorporate current guidelines and recent data on local therapy, including new strategies for surgical and radiation therapy, into the treatment of patients with breast cancer
• Integrate biomarkers, molecular assays, and other risk assessment tools in treatment decision making for breast cancer when appropriate
• Evaluate emerging clinical data regarding new agents and evolving strategies for the treatment of breast cancer, and apply clinical trial data appropriately in order to optimize the outcome of individual patients
• Utilize optimal strategies for preventing and treating breast cancer therapy-related side effects

TARGET AUDIENCE:
This educational program is directed toward medical, surgical, and radiation oncologists interested in the treatment of patients with breast cancer. Primary care physicians, obstetricians and gynecologists, nurse practitioners, nurses, physician assistants, researchers, and any other health care professionals with an interest in breast cancer are encouraged to attend.

ADA STATEMENT
If you need any of the auxiliary aids or services identified in the American with Disabilities Act in order to attend this course, call Carrie Jackman-Hoyle at 704.512.3720 or by email to carrie.jackman-hoyle@carolinashealthcare.org.

REGISTRATION
Registration includes education sessions, breakfast, refreshments and lunch. Your registration will be confirmed in writing. If you do not receive a written confirmation, please contact Carrie Jackman-Hoyle at 704.512.3702 to confirm registration status.

CANCELLATION POLICY
