

Kinesio Online Zoom Webinar FAQ

Where do I have to be to participate in the zoom meeting?

Anywhere that has internet access.

Do I have to have a partner for taping labs?

That would be best! If you can partner with another participant who is taking the course then you can practice on one another. You can also have a family member or friend on hand to practice your applications on.

What if I don't have anyone to tape during the course?

IF you don't have someone to practice on during the live webinar, you will be asked to video yourself taping someone at a later date, and send into the instructor for review.

Will the content be the same as a live course presentation?

Yes, you will still get ALL the content just in the comfort of your chosen location.

How will I get my Kinesio Kit?

Kinesio will ship your kit directly to your house 14 days prior to the course. Please provide a good address that is not a P.O. Box.

What if I have questions after the course?

The instructor regularly creates a voluntary WhatsApp group for attendees of each 3-day certification course. This allows for ongoing mentoring, problem solving and sharing with the specific group.

Can I still receive certification through this type of platform?

Yes! You will still receive all the training that you need to successfully take the Certification Exam and you will receive constructive input on your taping skills during the live webinar (*or after you turn in your video, if you don't have a model to tape on during the course*).

Will the instructor be able to demonstrate the Kinesio taping applications?

Yes! The instructor will have a model present during the webinar for demonstration.

Must I attend the full 2 days?

YES! To receive credit, you must attend both instructional days that are 8-hour days each.
