Course Description
The 39th Annual Internal Medicine Conference will provide an update on the most recent advances in the management of specific medical disorders, including the latest role of evidence-based clinical care and practitioners.

Conference Features Include
25 Presentations
3 Breakout sessions
3 Case discussions
3 Panels presented by invited speakers
4 Symposia

Target Audience
The presentations are intended for internists, family practitioners, generalists, and other health care providers working as an adult primary care setting.

Educational Objectives
The information presented at the educational activity should improve your ability to
2 Update the diagnostic approach for common conditions seen in your primary care practice with focus on the manpower and time constraints.
