This course provides a forum for surgeons, gastroenterologists, PCPs and mid-level providers to increase their knowledge in the multidisciplinary nature of HPB disease relating to transplantation/hepatology; HPB surgery; and interventional endoscopy.

**EDUCATIONAL OBJECTIVES**

Upon completion of this course, participants should be able to:

- Discuss new treatments and issues of drug resistance for Hepatitis C.
- Identify options and eligibility criteria for liver transplant for HCC.
- Discuss the expanding technology for estimating chemosensitivity and molecular profiling for HPB malignancies.
- Recognize the types and effectiveness of transarterial therapies and ablational therapies for hepatic tumors.
- Differentiate uses and effectiveness of therapeutic endoscopic procedures.
- Describe banding techniques for gastroesophageal variceal bleeding.
- Identify minimally invasive surgical procedures for liver resection, left pancreatectomy, and internal drainage of pancreatic pseudocysts.
